

Clydebank Health & Care Centre News

New £19million state of the art integrated Health & Care Centre a step closer as plans given green light

We are delighted to report that the West Dunbartonshire Council Planning Committee has approved the plans for a new Health and Care Centre in Clydebank (30th May 2018). This represents a £19m investment to replace the existing health centre with a new integrated centre at Queens Quay.

The plans support the provision of high quality services which will help improve the health and lives of the people of Clydebank. The new Health and Care Centre is scheduled to open in 2020. Over the coming months we will be keeping you up to date with building development at the site.

We will also be bringing you information on the services we plan to provide in the new Health and Care Centre. These include: existing GP Practices, Speech and Language Therapy, Antenatal Clinics, Community Paediatric Clinics, Podiatry and Sexual Health, along with many more specialty services.

We are looking forward to sharing with you on how the building will look inside and out over the coming months.

In the meantime, have a look at the Queens Quay development website where you can see time lapse drone footage showing you the site and watch the month on month progress as the development takes shape.

Why do we need a new Health Centre?

Our current building serves around 50,000 people across the Clydebank area. Sadly the building is starting to show its age. It is in a poor state and frequently needs repairs and maintenance.

Over the next ten years the Health and Social Care Partnership (HSCP) anticipates that there will be an increase in the amount of people within the area who will require additional support from a variety of services, such as Home Care, Community Older Peoples Services and Primary Care Mental Health. These teams will work alongside your GP from within the new Health & Care Centre to provide seamless care for the community.

In building a new state of the art premises, we can bring these services together and make them far more accessible to the people of Clydebank.

Keeping you informed

"I am so excited to be part of the team creating the new Clydebank Health and Care Centre. It will be an amazing and fully accessible building both inside and out."

**Jackie Maceira,
West Dunbartonshire Access Panel**

"The Podiatry Team are looking forward to working in the new building, being in the same corridor with the Treatment Room and Physiotherapy will allow improved joint working and shared care with their patients."

**David Bisset,
Podiatry Team Lead**

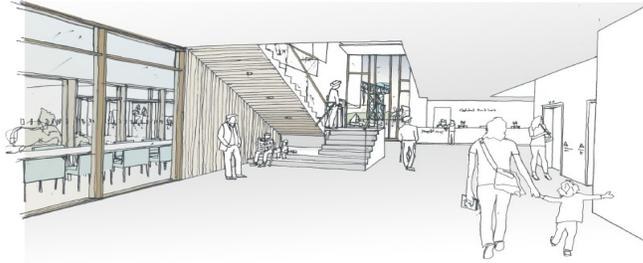

We have just completed our "Patient Travel Questionnaire" and we are keen to hear your comments and answer your questions.

As we go forward we will be updating you with information about travelling to and from appointments.

We will be getting regular updates on passenger transport systems to keep you informed on what buses, trains and cycle routes are available along with car parking facilities.

We will also be speaking to staff and patients to find out their thoughts on our new Care Centre.

We have worked very closely with Clydebank Access Panel to ensure our new building fulfils all their needs.

"The existing health centre is showing its age and is no longer fit for purpose. A well designed integrated health and care centre will ensure that current and future generations of Clydebank residents will have an essential range of services all on one central site."

**J Hardie,
Practice Manager**

"The new health centre looks like it will be a modern facility in beautiful surroundings and can only be beneficial for patients and staff."

M Boyd, Patient
